

BASIC SET-UP GUIDE

1 Unpack the telephone

Remove the cordless handset, charger base and all components from the packaging.

Remove the protective plastic from front of the charger and handset.

Remove the printed tag from underneath the charger.

2 Install batteries in the cordless handset

Remove the battery cover from the back of the handset by pressing on the notch and sliding the cover down and off.

To connect the battery pack, insert the connector into the jack located inside the handset as shown (the connector will only fit one way). Push until it clicks into place.

Tug gently on the wires to make sure the connection is secure.

Place the battery pack into the battery compartment and replace the cover by sliding up and into place. Do not attempt to remove the batteries from the white plastic casing.

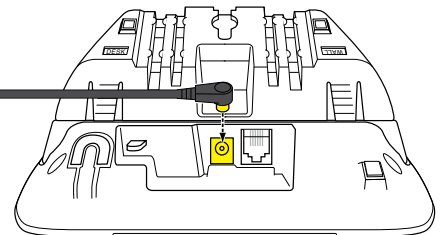

3 Connect the power cord

Find the power adapter.

Turn the charger upside down and connect into the socket marked **DC IN 9V**.

Plug the adapter into your wall socket (standard 240V power) and turn on power at the wall.

AC adapter to
power socket

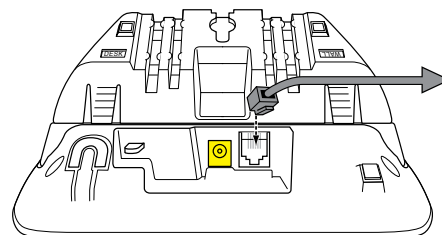

4 Connect the telephone cord

Find the telephone cord. Connect the telephone line by inserting one end into the charger at the socket marked **TEL LINE**.

Insert the other end into your standard wall telephone connection.

BASIC SET-UP GUIDE

5 Charge the handset

Place the cordless handset into the charger cradle. A red charge light illuminates, the display should activate and a battery icon will animate to indicate the handset is charging.

Charge the handset for at least 15 hours before initial use.

If the handset does not charge	Remove and replace the handset, ensuring it is properly seated in the cradle
	Check the power adapter connection.
	Make sure power is switched on at the wall

6 Test the handset connection

Pick up the handset and press **TALK**.

You should hear a dial tone, and the handset display should say **TALK**.

Press **TALK** again to hang up.

If you cannot get a dial tone or the handset display says CHECK TEL LINE	Check the telephone line is properly inserted, both in base and wall socket
	Try an alternative telephone wall socket
	If you continue to experience difficulty, contact your local telephone provider

If there is a lot of noise or static	See page 29 of the Owner's Manual for tips on avoiding interference
---	---

When you hear a dial tone, make a quick test call.

Press **TALK** to hang up.

7 Setting the day and time

Setting the date and time on the any handset will set it on all handsets/bases.

Remove the handset from the cradle.

Press **MENU/OK** to open the menu screen.

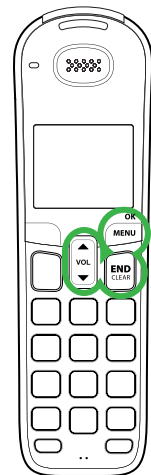

Use Volume \blacktriangle buttons to move the selector bar to **DATE & TIME**.

Press **MENU/OK** again to confirm your selection.

Use telephone keypad to select the date and time. Use Volume \blacktriangle buttons to select **AM** or **PM**, and press **MENU/OK** to confirm your selection. This returns you to the Main menu.

As an example of using the telephone keypad (to enter the date, hour and minutes: to enter 27 February 2013 - 5:35pm, press on keypad '2', then '7', then '0' and '2' (for February), then '1' and '3' (for the year), then '0', then '5', then '3' then '5' then \blacktriangle (to select AM or PM) and **MENU/OK**.

Press **END/CLEAR** to exit the menu screen.

BASIC USER GUIDE
